CVS – Demarc to Phone Cabinet [Troubleshoot] / [Extend] Elevator Line NET techs will LOG IN/LOG OUT LIVE by calling (608) 827-2283. DO NOT AUTO LOG IN* ----- Elevator Phone Line will either be set up as Scope 1 or Scope 2 below. [SCOPE 1] Need tech to troubleshoot/extend connection for elevator line [404-892-8473] from the demarc to the A-row (Green Jacks) located in the white phone cabinet. All store lines should come in on the orange telco 66 block and then cross connect over to (2) subsequent CVS 66 blocks. One of the 2 CVS blocks will have a 25 pair Amphenol cable that runs to the A row in the white phone cabinet which is typically located in the Manager's office or in the back demarc area. Once dialtone is restored to the A row tech will need to cross connect to cable run that runs out to the elevator control room on the 100/200 series jack. Once cross connect is made at the demarc, dial tone needs to be confirmed at the other end of the jack in the elevator control room. Jack should be labeled with the phone number. Tech will need to press the call button in the elevator to test outbound call.
