BRIEF STATEMENT OF WORK & COMMENTS

2021 Target Bundle C2: AP Camera (Qty 8 w AVM) - 43034

Cash Office - Vestibule AVM {AP 303} AVM T1453AVM0001 INT-AVM-WALL
Cash Office - Vestibule {AP 302} XND-L6080 T1453CAM0114 INT-L6080-CEILING-TILE-8
Cash Office - Room {AP 400} XND-L6080 T1453CAM0115 INT-L6080-CEILING-TILE-8
Control Room {AP 401} XND-L6080 T1453CAM0116 INT-L6080-CEILING-TILE-8
AP - Booking Room {AP 403} XND-L6080 T1453CAM0117 INT-L6080-CEILING-TILE-8
AP - Camera Room {AP 549} XND-L6080 T1453CAM0118 INT-L6080-CEILING-TILE-8
Stockroom - Fire Aisle {AP 681} XND-L6080 T1453CAM0119 INT-L6080-WALL
Cash Office - Counting Table/Camera Ready Dome {AP550} - Cable run and Dome only

Run all front end camera data cables to the Control Room. Run Stockroom cameras cable to the nearest IDF/Switch. Plug into any open port and provide for Crosscom to configure into their Security Desk.
Work with Crosscom level 2 to do camera angle adjustments.

AVM - The monitor requires its own power cable, the decoder on the back of the unit will be POE. Connect to the left port on the 3 port mini switch on the back of the monitor. Run power cable to the control room, install power supply in control room. However, if there is an existing power supply in the room you can use that. Power supplies can have up to 3 AVMs connected. We will ship back the power supply if it was not used.

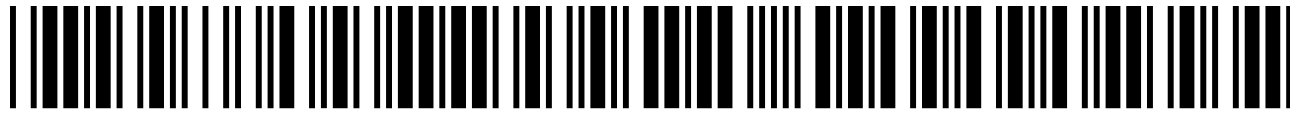

***NOTE If any of the offices has hard ceiling and we can not install the ceiling tile domes, please notify Crosscom.

The equipment not sent by Crosscom. If any parts missing, let Crosscom know so we can order them.

For your deliverables (pictures of the installed cameras and domes) please provide a tag in the pictures (example hold up a sheet of paper with store number and the camera name) Thanks!

TRIP INFORMATION

Arrival Date	Arrival Time	Time Zone	Trip Description	# Of Tech
--------------	--------------	-----------	------------------	-----------

**TECHNICAL NOTES:****HARD START!!**

AP Camera Scope: Tech will be replacing pre-determined analog security cameras with qty 7 digital cameras. Uninstall analog security camera and fixture and install net-new domed security cameras in various locations. If applicable, also install Personal View Monitor (PVM). Perform new cable run from newly installed camera to nearest IDF or MDF. Target to supply prints of camera locations and requested cable runs.

If new camera will be installed over sales floor, that location will need to be completed first prior to store opening or after closing. Lift will be provided.

Install Expectations:

Tech provides ladder or lift provided if needed

Find existing cameras in scope for refresh

Unbox and stage new camera

Uninstall analog camera

Install new camera

Perform Cat6a cable run back to prescribed IDF or MDF.

Plug network cable into camera

Once plugged in, work with Deployment Support to configure camera and to align camera shot

Removed Devices to be placed on CRC pallet

Install PVM for Team Member Door, Trucker Door AP Holding Room & Cash Office Vestibule scopes.

* Trip: 2 technicians are required for (1) trip after hours (2nd night if required).

* Materials: CrossCom will provide cabling materials; VFT will provide miscellaneous cable management

* Special tools: Laptop w/ aircard, digital camera, Cat 6 cable tester with downloadable results. Ladders (6', 8' & 12'), Label Maker

* The technicians will log in and out with the CrossCom National Project Team @ 800-820-9229.

* Deliverables will be required to validate work completion and craftsmanship. All deliverables must be uploaded through the vendor portal prior to leaving the work site. Failure to provide deliverables will result in non-payment.
