

HAWORTHIA REINWARDTII

IDEAL LIGHT

Prefers partial shade. Can be grown indoors.

WINTER HARDINESS

Not frost tolerant - protect from freezing

PROPAGATION METHODS

Offsets, seed

WATER NEEDS

Water only when soil is dry

MATURE SIZE

8 inches tall

ADDITIONAL NOTES

Haworthia reinwardtii is a small clumping succulent. Its leaves are large at the bottom, then narrowing to a point as it curves upwards. The leaves spiral in a column, and have white bumps on the outside of the leaves.

This succulent is great for use in rock and fairy gardens that receive plenty of shade. It's also great for indoor growers.
