

**SEDUM NUSSBAUMERIANUM**  
**“COPPERTONE SEDUM”**

## IDEAL LIGHT

Plant in full sun to light shade

## WINTER HARDINESS

Not cold hardy, protect from extended periods of frost

## PROPAGATION METHODS

Easily propagates from seed, leaf cuttings, or stem cuttings

## WATER NEEDS

Typical water needs for a succulent

## MATURE SIZE

Rosettes grow up to 3" (7.5 cm), and about 8 " (20 cm) tall.

## ADDITIONAL NOTES

Coppertone thrives on neglect, so be careful not to over-water! Lightly fragrant flowers in the spring.

Dormant in hottest months. It shows off its beautiful copper color when it's "stressed" in full sun.
