

Glowing Tones Exercise

3-4 minutes

String Physics

Dennis Whittaker

1. A "Glow" is a sympathetic vibration on another string.
2. Play each measure in the exercise 4 times.
3. Leave the bow on the string during rests to let the glowing tone ring freely.
4. Tune your ear to hear the flowing tones at the same time as the written note.
5. The diamond note represents the sympathetic vibration that will sound automatically if the written note is perfectly in tune.
6. Make sure your left hand fingers are touching only one string.
