

GRAPTOPETALUM PARAGUAYENSE  
“GHOST PLANT”

## IDEAL LIGHT

Partial to Full Sun

## WINTER HARDINESS

Not cold hardy

## PROPAGATION METHODS

Cuttings, leaves

## WATER NEEDS

Water only when soil is dry

## MATURE SIZE

Rosettes 4 in (10 cm) Plant: 3 ft (91 cm)

## ADDITIONAL NOTES

This Graptopetalum has beautiful trailing rosettes, perfect for a hanging pot.

When grown in full sun, these Graptopetalums will turn yellow-pink, however in shade it will be bluish-grey.

It grows extremely quickly and can easily stretch out or get “leggy” if it doesn’t receive enough light.
