6. Work with the Manager to get some register printer paper from the store supply to load up paper into the BOPIS printer.
7. Notify the ROC that the printer has been installed and provide the printer serial number to the ROC.
8. Affix a label on the printer with a label maker (no hand written labels). Label should read "BOPIS Printer".
9. Once installed the ROC will perform some tests to confirm everything is working and will send a test print to the printer.
10. **Note: The printer will connect wirelessly to the store WiFi, however, in some circumstances the WiFi signal may not be strong enough. In these cases the printer will need to be connected to the CVS LAN either through an available black jack under the front counter (if one is open) or by running a new cable from the front counter to the main store switch. If this is required, the ROC will notify the technician on-site.**
11. Logout with ROC/NET
