**Content Standards** 

# Vocabulary Start-Up

A circle is the set of all points in a plane that are the same distance from a point, called the center. The circumference is the distance around a circle. The diameter is the distance across a circle through its center. The radius is the distance from the center to any point on the circle.

Fill in each box with one of the following terms: center, diameter, and radius.

## Real-World Link

1. The table shows the approximate measurements of two sizes of hula hoops.

Size	Radius (in.)	Diameter (in.)	Circumference (in.)
child	14	28	88
adult	20	40	126

- a. Describe the relationship between the diameter and radius of each hula hoop.
- b. Describe the relationship between the circumference and diameter of each hula hoop.

# Key Concept

# **Radius and Diameter**

Work Zone

**Words** The diameter d of a circle is twice its radius r. The radius r of

a circle is half of its diameter d.

Symbols 
$$d = 2r$$

$$r = \frac{d}{2}$$

# Examples

1. The diameter of a circle is 14 inches. Find the radius.

 $r = \frac{d}{2}$  Radius of circle

 $r = \frac{14}{2}$  Replace d with 14.

r = 7 Divide,

The radius is 7 inches.

The diameter of a circle is 36 inches. Circle the radius.

72 in. 18 in.

2. The radius of a circle is 8 feet. Find the diameter.

d = 2r Diameter of circle

 $d = 2 \cdot 8$  Replace r with 8.

d = 16 Multiply.

The diameter is 16 feet.

Got It? Do these problems to find out.

Find the radius or diameter of each circle with the given dimension.

**a.** 
$$d = 23 \text{ cm}$$

**b.** 
$$r = 3$$
 in.

**c.** 
$$d = 16 \text{ yd}$$

**d.** 
$$r = 5.2$$

b. \_\_\_\_

c. \_\_\_\_\_

d.\_\_\_\_\_

## Circumference

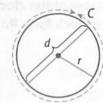

Key Concept

Words

The circumference of a circle is equal to  $\pi$  times its diameter or  $\pi$  times twice its radius.

**Symbols**  $C = \pi d$  or  $C = 2\pi r$ 

Model

In the Inquiry Lab, you learned that  $\frac{C}{d} \approx 3$ . The exact ratio is represented by the Greek letter  $\pi$  (pi). The value of  $\pi$  is 3.1415926.... The decimal never ends, but it is often approximated as 3.14.

Another approximation for  $\pi$  is  $\frac{22}{7}$ . Use this value when the radius or diameter is a multiple of 7 or has a multiple of 7 in its numerator if the radius is a fraction.

## Example

3. Find the circumference of a circle with a radius of 21 inches.

Since 21 is a multiple of 7, use  $\frac{22}{7}$  for  $\pi$ .

$$C = 2\pi r$$

Circumference of a circle

$$C \approx 2 \cdot \frac{22}{7} \cdot 2$$

 $C \approx 2 \cdot \frac{22}{7} \cdot 21$  Replace  $\pi$  with  $\frac{22}{7}$  and r with 21.

$$C \approx 2 \cdot \frac{22}{7} \cdot \frac{21}{1}$$

Divide by the GCF, 7.

Simplify.

The circumference of the circle is about 132 inches.

Got It? Do these problems to find out.

Find the circumference of each circle. Use  $\frac{22}{7}$  for  $\pi$ .

e.

### Estimation

To estimate the circumference of a circle, you can use 3 for it since π≈3.

£.

### Example

4. Big Ben is a famous clock tower in London, England. The diameter of the clock face is 23 feet. Find the circumference of the clock face. Round to the nearest tenth.

 $C = \pi d$ 

Circumference of a circle

 $C \approx 3.14(23)$ 

Replace  $\pi$  with 3.14 and d with 23.

C≈72.2

Multiply.

So, the distance around the clock is about 72.2 feet.

Got It? Do this problem to find out.

g. A circular fence is being placed to surround a tree. The diameter of the fence is 4 feet. How much fencing is used? Use 3.14 for  $\pi$ . Round to the nearest tenth if necessary.

# **Guided Practice**

Find the radius or diameter of each circle with the given dimension.

(Examples 1 and 2)

1. d = 3 m

**3.** d = 20 in.

Find the circumference of each circle. Use 3.14 or  $\frac{22}{7}$  for  $\pi$ . Round to the nearest tenth if necessary. (Examples 3 and 4)

4.

6. Building on the Essential Question A circle has a circumference of about 16.3 meters and a diameter of about 5.2 meters. What is the relationship between the circumference and diameter of this circle?

### Rate Yourself!

How confident are you about finding the circumference? Check the box that applies.

# Independent Practice

Find the radius or diameter of each circle with the given dimensions.

(Examples 1 and 2)

1. d = 5 mm

2. 
$$d = 24 \text{ ft}$$

3. 
$$r = 17 \text{ cm}$$

Find the circumference of each circle. Use 3.14 or  $\frac{22}{7}$  for  $\pi$ . Round to the nearest tenth if necessary. (Example 3)

6.

- The largest tree in the world by volume is in Seguoia National Park. The diameter at the base is 36 feet. If a person with outstretched arms can reach 6 feet, how many people would it take to reach around the base of the tree? (Example 4)
- 8. The Belknap shield volcano is located in the Cascade Range in Oregon. The volcano is circular and has a diameter of 5 miles. What is the circumference of this volcano. Round your answer to the nearest tenth? (Example 4)
- 9. GGSS Be Precise Refer to the circle at the right.
  - **a.** Find the circumference of the circle. Use 3 as the estimate of  $\pi$ .

- **b.** Find the circumference of the circle using 3.14 for  $\pi$ .
- c. Another estimate of  $\pi$  is 3.14159. Find the circumference using this estimate.
- **d.** What do you notice about the estimate used for  $\pi$  and the circumference of the circle?

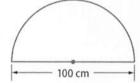

### Copy and Solve For Exercises 10-14, show your work on a separate piece of paper.

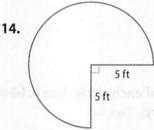

### Find the diameter given each circumference. Use 3.14 for $\pi$ .

- 10. a satellite dish with a circumference of 957.7 meters
- 11. a basketball hoop with a circumference of 56.52 inches
- 12. a nickel with a circumference of about 65.94 millimeters

### Find the distance around each figure. Use 3.14 for $\pi$ .

13.

### H.O.T. Problems Higher Order Thinking

- 15. Justify Conclusions Determine if the circumference of a circle with a radius of 4 feet will be greater or less than 24 feet. Explain.
- 16. CGSS Model with Mathematics Draw and label a circle that has a diameter more than 5 inches, but less than 10 inches. Estimate its circumference and then find its circumference using a calculator. Compare your results.

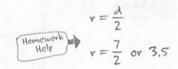

- 17. CGSS Persevere with Problems Analyze how the circumference of a circle would change if the diameter was doubled. Provide an example to support your explanation.
- 18. GSS Justify Conclusions Determine whether the relationship between the circumference of a circle and its diameter is a direct variation. If so, identify the constant of proportionality. Justify your response.

# **Extra Practice**

Find the radius or diameter of each circle with the given dimensions.

19. d = 7 in. 3.5 in.

**20.** d = 30 m

**21.** *r* = 36 ft

Find the circumference of each circle. Use 3.14 or  $\frac{22}{7}$  for  $\pi$ .

22.

23.

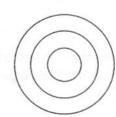

24.

25. a button with a radius of 21 millimeters

26. a dunk tank with a radius of 36 inches

- **27.** The diameter of a music CD is 12 centimeters. Find the circumference of a CD to the nearest tenth.
- 28. At a local park, Sara can choose between two circular paths to walk. One path has a diameter of 120 yards, and the other has a radius of 45 yards. How much farther can Sara walk on the longer path than the shorter path if she walks around the path once?
- 29. Identify Repeated Reasoning The diagram at the right is made up of circles with the same center. The innermost circle has a diameter of 1 unit. Each circle moving outward has a diameter one more unit than the previous. Without calculating, how much longer is the circumference of each circle?

**30.** A bicycle tire has a radius of 12.5 inches. Select values to complete the equation below to find the circumference of the wheel. Use 3.14 for  $\pi$ .

0.5	4
2	12.5
3.14	25

How far does the tire roll in one complete revolution?

- **31.** A circle with center at point *O* is shown. Determine if each statement is true or false.
  - **a.**  $\overline{ON}$  is a radius of the circle.
- True
- False

- **b.**  $\overline{QM}$  is a diameter of the circle.
- True
- False

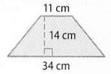

- **c.** To find the circumference, multiply the length of  $\overline{OL}$  by  $\pi$ .
- True
- False

# **Common Core Spiral Review**

Find the area of each trapezoid. 6.G.1

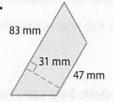

32.
