

SEMPERVIVUM 'HEDGEHOG'

## IDEAL LIGHT

Full sun to partial shade

## WINTER HARDINESS

Cold hardy

## PROPAGATION METHODS

Offsets, seeds (difficult)

## WATER NEEDS

Water only when soil is dry

## MATURE SIZE

3 inches tall

## ADDITIONAL NOTES

This monocarpic succulent is one of the “rollers” -- succulents whose “chicks” grow on top of the mother plant, and then break off and roll away before rooting. It has long, spiked dark red and green leaves.

This cold-hardy succulent is perfect in container gardens, as part of a green roof, and in mini gardens!
