RFI No. 2 E-RATE RFP #112917: WAN Services November 14, 2017

1. Question: If you look at your provided excel pricing sheet you will notice for example that Student Services Center and Extended Learning Center are both located at 755 North A Street. Based on the spreadsheet each of these would be a separate connection and each one of them would have a connection to both the district office and Perris High School. The question I was trying to ask is could Student Services Center and Extended Learning Center share a connection to the district office and share a second connection to Perris High School. That is how your current network is but based on your pricing sheet they would each have their own circuit.

Answer: These have been addressed and the pricing sheets have been published. Sites residing at the same location use one connection. They have been removed from the pricing diagram.

2. Question: Sorry I meant to say California Military Institute and Extended Learning Center are both at 755 A street. Take a look at my attached diagram and let me know which is the district looking for. The one of the left is what you have today at 755 North A street but your RFP has every single sight regardless if they share the same physical address having their own connections to each of the two data centers.

Which of these are you looking for?

Answer: We've corrected the price sheet. It is outlined in the supporting documents, but the current setup where a single line to CMI is the intended circuit.

3. Question: Someone needs to provide a new Pricing Sheet. Your pricing sheet doesn't make any sense. Take a look at it. You will see several mistakes. For example on line #31 you are asking for a circuit to go from Perris High School to Perris High School. I do not believe that the district is asking for any new circuits to existing locations but rather just new pricing and possible upgrades in speed. Attached is how I think your pricing sheet should look. I highlighted in RED the edits that I made and please run them past Technology. Here is an explanation of each edit.

- CIRCUITS TO DISTRICT OFFICE

1. Academy and Education Options share the same physical address so they should be together - **This has been addressed and Education Options has been removed.**
2. Military Institute and Extended Learning share the same physical address so they should be together - **This has been addressed and both Extended Learning and the Bus Barn have been removed.**
3. Perris Lake High School and Adult School share the same physical address so they should be together - **This has been addressed and Adult School has been removed.**

- CIRCUITS TO PERRIS HIGH

1. District Office can be removed because only 1 circuit should be required between the two Hub sites since they follow the same Pathway - **Exists in documentation to confirm hub site. Have grayed out fields where pricing is not needed.**
2. Perris High School Should be removed because you are not doing a circuit from Perris High School to Perris School - **Similar to the district office, this is in place to indicate the hub, but the price fields have been grayed out as we do not expect pricing for that site in that configuration.**
3. All the edits above apply to the circuit to Perris High School
4. On the 5 year pricing, change the term from 3 years to 5 years up in the header. - **Corrected.**

Answer: Bolded above.

Respectfully,

Nick Newkirk, Director of Purchasing

Perris Unified High School District
ERATE RFP # 110617: WAN SERVICES
Attachment 1: Price Bd Form 3yr

As described above, this project will provide minimum scalable 1 Gbps to 40 Gbps connectivity from Perris UHSD District Office (155 E. 4TH. Street, Perris, CA 92570) and to each of the following 8 existing sites. Additionally, a scalable 1 Gbps to 40 Gbps connectivity from Perris High School (175 E NUEVO RD, Perris, CA 92571) and to each of the following 8 existing sites. The term of the proposed agreement will be for 3 years and will include two 1 year renewal options which will be renewable upon mutual consent.

Primary Hub - District Office to All Sites
