

LITHOPS
“LIVING STONES”

IDEAL LIGHT

Prefers full sun but can tolerate some shade and indoor growing.

WINTER HARDINESS

Not frost tolerant - protect from freezing

PROPAGATION METHODS

Seeds

WATER NEEDS

Water only when soil is dry. Do not water in the Winter.

MATURE SIZE

1 inch tall

ADDITIONAL NOTES

Highly recognizable in the world of succulents, these “stones” are loved by collectors for their strange shapes and colors.

These slow growers have plump leaves with long taproots that grow underground, and are very sensitive to over-watering.
