

Programming Languages Pragmatics

OVERVIEW OF TERM PROJECTS

DR. ERIC CHOU

IEEE SENIOR MEMBER

Three Options for Term Projects

Start from the first day of the class and due on the last day.

You have three options for your term project.

You only need to pick one to work on:

- One Instruction Set Computer Assembler
- Learn one language for sorting algorithms
- One Compiler Design

You may work on one more if you wish.

Project Short Names:

We use these short names through out our course.

- One Instruction Project
- One Language Project
- One Compiler Project
