Scope of Work

CVS – Phone Cabinet [New Run] – RX Drive-Thru Intercom (Diebold PBX Unit)

NET techs will LOG IN/LOG OUT LIVE by calling (608) 827-2283. DO NOT AUTO LOG IN*

Need tech onsite to run a new cable for the Pharmacy Diebold drive thru [sensor connection] and/or [pbx connection]. New cable should run from equipment location to the phone cabinet and terminated to the next available 200 series port in the phone cabinet. Jack should be labeled as the corresponding 200 series port that new home run is terminated to (i.e. 201, 202, etc). Once cable is terminated and tested to spec tech will need to call into NET Support to confirm cross connect port.

Per CVS, the site recently upgraded their drive thru system and they need new cable run/jacks by the diebold box. The remodel team put a shelf in front of the current jack that is now unuseable. If you can move/reroute these cables and add them to new jack that would be acceptable.
