Scheduled Date and Time: 7/27/2021 11:45:00 AM

Scope of Work:

We have installed a new 24M/3M ATT Broadband. We asked the vendor to install the service into the managers back office, where the customer has a network rack located. Our task will be to locate that circuit, ensure it is extended to the rack and test it for connectivity. Once verified functional, we will need to reach out to the five below IT team, to assist them in cutting over the point of sale system and connect the new circuit to their Meraki device onsite.

Please read through the attached document as it details the specific process and to whom we should reach out when ready for cutover
