

SEMPERVIVUM ARACHNOIDEUM
'CEBENESE'
"COBWEB HOUSELEEK"

IDEAL LIGHT

Full sun to partial sun

WINTER HARDINESS

Winter hardy

PROPAGATION METHODS

Offsets

WATER NEEDS

Water only when soil is dry

MATURE SIZE

3 inches tall | 4 inches wide

ADDITIONAL NOTES

‘Cebenese’ has a webbed rosette that does very well in cold climates, even buried under snow!

‘Cebenese’ grows best outdoors, has pink edges, and produces many “chicks.” It is monocarpic, but will have many chicks before it dies.

It also works very well in vertical wall gardens.
