

CRASSULA ERFORATA  
“STRING OF BUTTONS”

## IDEAL LIGHT

Partial sun to partial shade. Can tolerate indoor growing.

## WINTER HARDINESS

Not frost tolerant - protect from freezing

## PROPAGATION METHODS

Leaves, offests, and stem cuttings

## WATER NEEDS

Water only when soil is dry

## MATURE SIZE

18 inches tall

## ADDITIONAL NOTES

“String of Buttons” is a shrub succulent. It grows well indoors, and does well in terrariums. The triangle-shaped leaves grow opposite each other and spiral around the stem, causing it to look stacked.

The gray-green leaves may have a pinkish tint to the edges if given enough light. Look for pale yellow flowers in the spring.
