

**GYMNOCALYCIUM  
MIHANOVICHII “MOON CACTUS”**

## IDEAL LIGHT

Prefers partial sun but can tolerate shade and indoor growing.

## WINTER HARDINESS

Not frost tolerant - protect from freezing

## PROPAGATION METHODS

Grafting and offsets

## WATER NEEDS

Water only when soil is dry

## MATURE SIZE

1 foot tall

## ADDITIONAL NOTES

This cute “mutant” cactus is actually a combination of two cacti, typically *Gymnocalycium* and a rootstock cactus, such as *Hylocereus*. The term “moon cactus” typically refers to the yellow and orange varieties, however red varieties can be included.

“Moon Cactus” is perfect for indoor growers.
