CE's overall Tasks

1. Locate and stage the equipment
2. Call RCC Helpdesk for a check-in procedure
3. **Do not proceed with the installation before the RCC Team has unlocked the BIOS**
4. Perform Installation of the same model Debit Readers with new Software named WebPOS to all Self Check-out units in the store according to RCC Halpdesks's guidance
5. Do not leave the site before all scoped units are installed or, in case of split insallation, before scoped portion of work has been done
6. **Once each lane is up and running, we need MOM to validate with the test transaction to ensure all processes are working as they should. After the test has been done, the outcome should be reported to RCC Helpdesk on the check-out call**
7. In case of split install: Inform MOM that after completing the work for that day they need to put the overpack box (with old and new units alongside 4 WebPOS Thumb Drives) on a safe location and let us know of the full name and job title of MOM in charge of safekeeping
8. After the designated work has been done, CE is to call RCC Helpdesk for a check-out procedure

NCR Confidential

NCR Rollout Helpdesk +1 877 800 9465 opt 5; RW230081@ncr.com

9. Calling RCC Helpdesk for a check-out procedure

- In case of split install:
 - **For every visit**, but the last one, CE needs to send the **SN Capturing Form alongside the Overpack Box Location Details Table to RCC** Helpdesk email RW230081@ncr.com with Manager's signature at the bottom of the Form confirming all scoped units are operational
 - **On the last day of the install**, CE is to send the **Manager's sign-off sheet alongside the SN Capturing Form** from that day and **Old Equipment TRK# Table** to RCC Helpdesk
- **In case of one day install**, CE needs to send full documentation (Manager's sign-off sheet, SN Capturing Form, Old Equipment TRK# Table)
- **In case of OBF unit**, CE should follow the OBF procedure as described below and inform RCC Helpdesk of it on the Check-out call

***In case of any delay, technical or any other kind of issue at site, CE should not leave site and should immediately contact RCC Helpdesk in order to reach the resolution**

Re: Self Checkout Software Upgrade

Letter of Authorization

The following is a confirmation memo that the install vendor should carry and surrender upon request to any member of Management. The following install vendors are allowed to work on this project: **NCR**

This memo verifies that they have been authorized to perform the following work in our stores and clubs.

Information for the stores:

- Communication regarding self checkout software upgrade was sent to stores in AMP+.
- NCR technicians will need access to the facility, including the Self Checkout registers. If customer lines start to develop the NCR tech will wait to start installing scanners on more SCOs to allow customers to flow through.
- NCR technicians will sign in on the vendor book and check in with a member of the management team.
- The purpose of this project is to install new software and cables on self checkout registers.
- Store management needs to stay with NCR until SCO software is complete. NCR is required to stay for 1 night installs unless SCO count requires more nights to complete.
- NCR should begin work promptly at 8pm. Store closing actions (SCO check-in) can still be completed on all SCOs except the few currently begin updated, once available the remaining SCOs can be checked in. Store have until 3am to check-in all SCOs.
- This letter is invalid after: Nov. 10, 2021

If the person in possession of this document does not provide proper identification or for any reason gives cause for any member of Management within the store to suspect that they should not be in the store, please contact the Project Manager designated for the above Project: For Wal-Mart related issues (**Nathan McClure**) at 479-685-9097 or via e-mail (nathan.mcclure@walmart.com), and for NCR related issues (Sunny Ferguson-Petroff) at 4479-595-4979 or via e-mail (Sunny.ferguson@ncr.com). If you are unable to contact the above Project Manager, please call Field Support at (479) 273-4357.

NCR Technician: Under this LOA, you are an independent contractor. As such, neither your action nor inaction may be attributed to Walmart. Your Representatives are not Walmart's employees and have no authority to act on Walmart's behalf. Any questions concerning this LOA should be directed to the Walmart associate identified below or a member of Store Management.

Shipment Details

- All Debit Readers will be shipped in one overpack box alongside:
 - - 1 Return Shipping Label for all old equipment
 - 1 RMA sheet for all old equipment
- 4 WebPOS Thumb Drives will be shipped in total for the entire installation scope with 2021 label on them

***NCR will not be providing new styluses nor power cords, so the CEs will connect the ones in use on site.**

De-installed and OBF equipment

OBF procedure

- **OBF can be only be declared by RCC L2 Team**

***In case of the WebPOS Debit Reader not performing well after installing, but the DR is communicating with the server (not able to read cards and similar) and all disposable Troubleshooting steps have been taken, we will declare it as OBF and order a new unit. Until we have the new unit on site, please leave the DR connected and advise store to use Cash Only Mode.**

NCR Intellectual Property – Concepts may not be used without written permission from NCR Contents should not be shared with third parties

NCR Rollout Helpdesk +1 877 800 9465 opt 5; RW230081@ncr.com

- **In case of declared OBF unit please leave the Debit Reader connected to SCO machine** and proceed with the suggested Back out Procedure on page 30 of this document
- **The PMO Team will order the new unit**
- When we have new unit on site and have scheduled revisit, CE scheduled for a revisit is to take off the OBF unit and follow the Return Shipping Label procedure from below.

***We will not send the Old and OBF units together in one shipping back to BCS**

Return shipping Label Procedure for OBF units

- It is the CE's responsibility to use the Return Shipping Label that was shipped in a box with the new unit and to provide the TRK# of the label to RCC Helpdesk before dropping it off to FedEx location. CE is to populate the RMA sheet which will also arrive in the box with the new unit.
- Proof of drop off is required to be sent to RCC Helpdesk via email RW230081@ncr.com in the form of a receipt confirming drop off

In case of OBF being returned and before shipping the old units to BCS units please populate the table below and send to RCC Helpdesk alongside the rest of the Deliverables:

DO NOT SEND OBF AND OLD EQUIPMENT TOGETHER !

Old and OBF TRK# Table

Store number #	
MOM's name	
Return shipping label TRK#	

In case of split install populate the table below and send to RCC Helpdesk alongside the SN Capturing Form

Overpack Box Location Details Table

Store number #	
MOM (full name and job title) confirming overpack box with old and new units alongside 4 WebPOS Thumb Drives has been secured	
Location of the overpack box

NCR Rollout Helpdesk +1 877 800 9465 opt 5; RW230081@ncr.com

Return shipping Label Procedure for de-installed units

- **After all the units from scope have been installed**, it is the CE's responsibility to drop the units to the nearest FedEx location using the box from the new unit to pack the old one for sending back to BCS and the Return Shipping Label that came in a box with the new unit
- CE also needs to populate the RMA sheet that came in a box with the new unit: type in their name (**print the name not sign**) and put a date on it
- Proof of drop off is required to be sent to RCC to email RW230081@ncr.com in the form of a receipt confirming drop off

WEBPOS Installation

1. Before replacing each Debit Reader, CE should pack the old unit one-by-one into the new unit box and place it in an overpack box in which new equipment has been delivered
2. Contact RCC for a check-in procedure to (877) 800 9465 opt 5
3. Ensure that HHS is plugged into IO board
4. **Do not proceed with the installation before the RCC Team has unlocked the BIOS**
5. Inform RCC to unlock bios on lane (lane needs to be online)
6. Once confirmed it's unlocked, plug in thumb drive and enter BIOS
7. Attach a keyboard to the SCO unit.

REBOOT THE SCO UNIT AND PRESS THE DELETE KEY WHEN THE GREEN NCR LOGO IS DISPLAYED

On the BIOS setup main screen, the BIOS version is displayed at the top of the screen. If the BIOS version is earlier than 9.1.0.1, the change cannot be made (ex. 9.0.9.0).

8. Inform RCC to start working on network settings
9. Set BIOS configuration as shown below

WebPOS Back out Procedure

In case of a faulty image on a new Debit Reader we will utilize one of the following procedures for backing the lane out.

Please call RCC Team for the support on this to (877) 800 9465 opt 5.

Backout via Thumb Drive image back to Legacy:

1. RCC needs to unlock BIOS using the following command
 - a. C:\SCOT\BIN\BIOSMode /UNLOCK
2. RCC needs to initiate Backout via iPam tool to revert the lane back to original network settings
3. Leave WebPOS Debit Reader connected
4. Insert Legacy Thumb Drive to begin imaging
5. Once Image has been completely transferred to the lane and setup begins
 - a. Keyboard can now be reconnected to finish SCO setup process

***SCO to be used in Cash Only Mode until we have new unit on site**

Backout via HDD swap:

1. RCC needs to initiate Backout via iPam tool to revert the lane back to original network settings
2. Power lane down
3. Leave WebPOS DR connected
4. Proceed with swapping out HDD
5. Power on lane once HDD swap has been complete
6. Perform SCO setup
7. Disconnect the Keyboard (if attached)

***SCO to be used in Cash Only Mode until we have new unit on site**

Appendix B

BIOS Unlock Procedure For CEs

In instances when RCC Team is not able to access BIOS, it will be necessary for CE to unlock the BIOS themselves. For that purposes please follow the BIOS Unlock procedure for CEs from below:

- a. Power down the SCO and unplug the power supply cable
- b. Open the head unit to access the motherboard
- c. Locate the J21 jumper next to the RAM memory, close to the heatsink
- d. Move the jumper cap to cover the center and the previously uncovered pin
- e. Leave the jumper cap in that position for a couple of seconds
- f. Return the cap to the original position
- g. Close the head unit, reconnect the power cable
- h. You can now power on the lane and the BIOS should be unlocked

Troubleshooting

Sizing the WebPOS Browser

- **Browser not on full screen mode**
 - 1) Click on the 3 lines menu on the right side of the address line of the browser.
 - 2) Select “Full Screen”

- **Browser graphics is too large or overlapping**
 - 1) With a keyboard, hold the ALT + SPACEBAR.
 - 2) A size menu will appear on the upper left hand side.
 - 3) Select “Restore”, this will take the browser out of “Full Screen” mode.
 - 4) Click on the 3 lines menu on the right side of the address line of the browser.
 - 5) Verify the zoom is at 100%, adjust if not.
 - 6) If already at 100%, minimize the browser, and right click on the desktop
 - 7) Select Display settings, verify the resolution is 1024x768, if not adjust to size.
 - 8) Maximize the browser and set to “full screen” mode.

Scanner Scale Offline

- 1) Push the supervisor button and let diag run. Unit will then Reboot.
- 2) Reseat the comm cable in port H.
- 3) Clear CADD and reseat the I/O Power Supply. Reboot unit

GSR50 Main Module Comm Issue

- 1) Push the supervisor button and let diag run. Unit will then Reboot.
- 2) Validate error code lights on the unit.
- 3) Validate no jams are present
- 4) Reset the GSR50 comm cable on the I/O and on the main unit
- 5) Run manual reset on the GSR50

Hanging on Toshiba Splash Screen

- 1) Select the “Status Details” to see if any hardware errors are present
- 2) Reboot the lane
- 3) Engage Walmart on Bridge Line to validate communication

NCR Confidential

NCR Intellectual Property – Concepts may not be used without written permission from NCR Contents should not be shared with third parties

NCR Rollout Helpdesk +1 877 800 9465 opt 5; RW230081@ncr.com

Server connection (stuck on desktop)

- 1) Wait more than full 4 mins to confirm that the application is not running in background
- 2) Reboot the Lane
- 3) Engage Walmart on Bridge Line to validate communication

EOD (End of Day) Report

- 1) If the SCO reboots between 12AM to 3AM, may freeze on running the EOD Report
- 2) Reboot the lane
